

PARONHEL-E[®]

pasta

Laboratorio
FUNDACION

COMPOSITION: 6 Paste with Metrifonate: Pyrantel Pamoate 41.53 g; Metrifonate 43.48 g; Excipient c.s.p. 100 g

ACTION: Broad spectrum endoparasiticide for horses.

INDICATIONS: For the effective control of the following parasitosis, in all its stages:

- Ascariasis: (*Parascaris equorum*).
- Strongylosis: Large Strongyles (*S. vulgaris*; *S. equinus*; *S. edentatus*), Small Strongyles.
- Pinworm: (*Oxiurus equi*).
- Gastrophilosis: cavitary myiasis
- Cestodes: *Anaplocephala* sp.
Paranaplocephala sp.

PARONHEL-E paste does not create habit, being also highly effective against parasites resistant to benzimidazoles (mebendazole, oxbendazole), probenzimidazoles (febantel), phenothiazine and avermectins.

ROUTES OF ADMINISTRATION: Oral.

DOSAGE: To supply PARONHEL-E paste, no prior fasting is required; for being non-toxic doesn't interfere with training. The applicator is supplied with a stopper that allows dosing 250, 500 and 750 kgpv. It also has a scale in which each measure (a line on the scale) corresponds to the dose for 100 kgbw. (equivalent to 4 cc / 100 kgpv.) If only a few doses are used, the product must be kept in the original box.

PARONHEL-E paste has a high therapeutic margin. It's completely non-toxic to the pregnant mare, stallion and suckling foal.

PRECAUTIONS: Concomitant use with central nervous system depressants or muscle relaxants or cholinesterase inhibitors is not advisable.

USE RESTRICTIONS: Do not supply to equines intended for human consumption.

CONTRAINDICATIONS: Does not have.

POISONING: in case of involuntary ingestion, and if the patient is conscious, administer a large volume of water. If necessary, apply an intravenous corticosteroid. Go quickly and with the product container to the nearest doctor and contact the specialized assistance toxicological centers.

PRESENTATION: PARONHEL-E paste: athermic containers containing an oral applicator with two doses for 500 kgbw. (1,000 kg total), graduated every 100 kgpv and with a scale stop at 250, 500 and 750 kgpv.
